

National Truckwash Billing Cycle

Use key to turn on water at any Truckwash location.

Truckwash usage is recorded.

Data is transferred electronically to Avdata.

Avdata collates & processes data.

Bills are generated & sent to customers.

Customers send payments to Avdata.

Avdata sends monthly payments & reports to each Truckwash owner.

Why use the Avdata Billing Service?

What Avdata does

Avdata, central billing agent for many Australian truckwashes, offers an efficient means of raising revenue from your truckwash.

Avdata manages the whole billing process: maintains a database of truck owners & operators; collects and processes truckwash data; calculates charges; prints and mails statement/tax invoices; receipts payments; handles queries; refers debt recovery action.

Advantages

The centralised nature of the Avdata service provides a number of advantages:

- Avdata maintains a comprehensive database of truck ownership and key registration.
- Avdata supplies the equipment you need to control access to your truckwash.
- Just one key is required for each truckwash user to access any facility in the National Truckwash System.
- Each user receives one statement/tax invoice per month for charges incurred at all facilities.
- Avdata handles all queries and receipts payments on your behalf.
- Avdata statement/tax invoices are fully GST compliant.
- Each month you receive reports for management, planning & GST purposes.
